

## User Guide

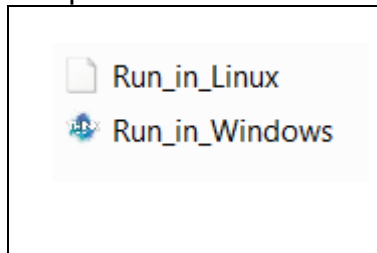

### System requirements

- Windows® XP, Vista, 7, 8 or 10. Linux. Any Debian 8 based distributions. Mac OS X 10.8, 10.9 and 10.10.
- Version 1.0 Software by Conectia S.L. Made in the EU.
- © Cambridge University Press 2016.

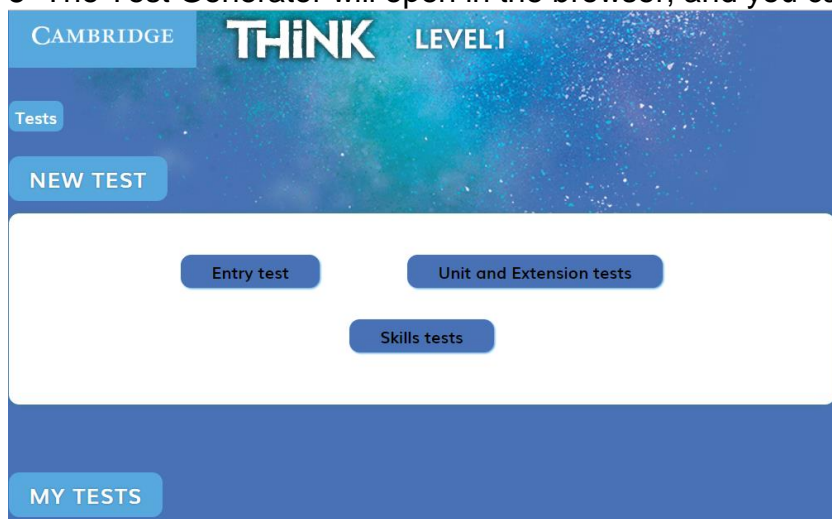

### Installing the *Think* Test Generator from a zipped file

1 Download the zipped folder to your computer, then extract the content. To do so, you may need to download a decompression tool. A new folder named after the ZIP file will be created.

2 Open the folder and double click on the corresponding file.

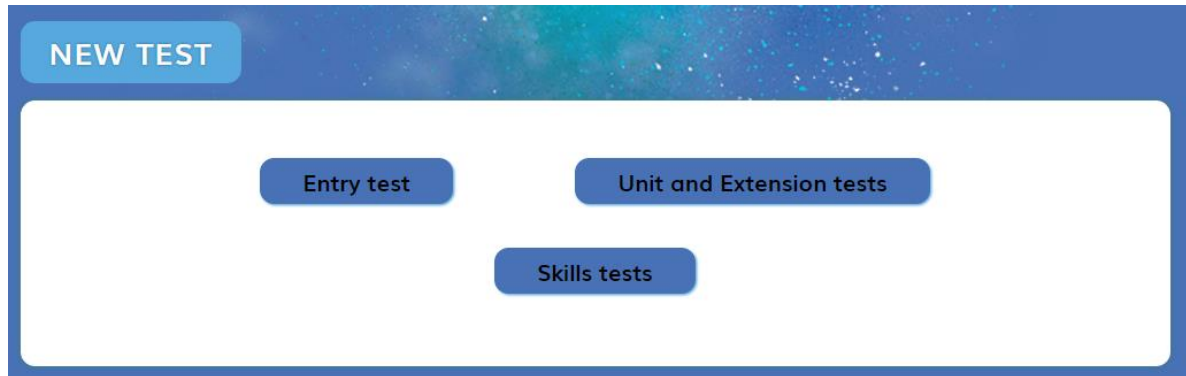

3 The Test Generator will open in the browser, and you can start using it.

### Using the *Think* Test Generator

The *Think* Test Generator makes it easy to create different types of tests at different levels. The Unit and Extension tests can be fully customised to meet the teacher's needs.

1 Click on the **Unit and Extension tests** button.

2 Select the Unit(s) and tests you want to include.

Unit	1	2	3	4	5	6	7	8	9	10	11	12
Test	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Extension	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

3 Choose **Ready-made** for PDF tests, or **Select the questions** for tests that you can customise and download as Word documents. Audio files will be automatically included alongside the Skills tests.

4 If you choose **Ready-made**, your test will be downloaded immediately as PDFs in a zip file.

5 If you choose **Select the questions**, you can then choose between **Manual** and **Auto** ways to create your test:

## Manual

When you choose **Manual**, you can view all sub-questions within each question and choose which you want to include.

### Vocabulary

Circle the correct answer A, B or C. (Unit 6 Test) (2/9) 

- Hi Judy,  
I got your email \_ afternoon and I understand your problem.  
- When I was young, I was afraid to sing \_ public too.  
- I got worried every time I \_ a mistake on stage. It took time to feel confident.  
- So just keep going and be \_ .  

## Auto

Choose the number of sub-questions you want to include for each question, and the *Think* Test Generator will automatically choose them for you. In the example below, you can choose up to 8 sub-questions for each question, but you won't see which ones the Test Generator has chosen until you generate the test.

### Vocabulary

- Circle the correct answer A, B or C. (Unit 6 Test) 0/9 ▾
- Complete the sentences. Use the adjectives. (Unit 6 Test) 0/8 ▾
- Underline the mistakes and correct the sentences where necessary. (Unit 6 Test) 0/8 ▾
- Circle the correct words. (Unit 6 Extension) 0/8 ▾
- Complete the sentences. (Unit 6 Extension) 0/8 ▾
- Correct the sentences where necessary. (Unit 6 Extension) 0/8 ▾
- Read the meaning. Write the word. (Unit 7) 0/8 ▾
- Complete the sentences with the words or phrases in the box. (Unit 7 Test) 0/8 ▾
- Look at the pictures. Write the expressions. (Unit 7 Test) 0/6 ▾

**6** Give your test a name and select **Generate**. The *Think* Test Generator will create two versions of your test, A and B. It will re-order the sections in the B version of the test (i.e. the Grammar, Vocabulary and Functions sections appear in a different order).

**7** The *Think* Test Generator will download a zipped file containing your test as Word documents, both with and without answers. Save these to your computer, extract the files, and your tests will be ready to use.
